Now I want to develop an automatic test to ensure that the service is working, so I need to connect to the database. I've implemented the service with Spring and I'm using H2 in the database for development. When I put the test code into the same project as the service code, I get the following error: java.lang.ClassNotFoundException: org.h2.tools.FS at java.net.URLClassLoader.findClass(URLClassLoader.java:381) at java.lang.ClassLoader.loadClass(ClassLoader.java:424) at java.lang.ClassLoader.loadClass(ClassLoader.java:357) How can I solve this? A: I just built the H2-database directly from sources and imported it to my project (and configured SpringBoot). I only had to add few lines of code to the application.properties and that solved the problem. Charlton Heston Shatner's back! Yep, nothing like a good Star Trek movie to lend left to a career. ... but when you play the part of a 67-year-old actor in a huge ensemble like Star Trek (2009), you're gonna need a bigger boat. John Cho was born to play the elder Spock. And Kirstie Alley? She's perfect in the older Carol Marcus. We all have that one comedy buddy who's so authentic and uncensored that you don't even mind spending time with them. Kurt Braunohler is just such a guy. Is he a funny guy? Absolutely. Is he the most entertaining person in your life? Not even remotely. So how does he get on TV? How could he possibly not. Who doesn't love a good story about a sexy superhero lady? Dan Stevens has the looks, the charm, and the confidence to carry an entire movie, and that's exactly what he's doing with Legion. He's

iPhone Video Converter Factory Pro Crack Serial Number Full Torrent [Win/Mac]

iPhone Video Converter Factory Pro is a software utility that specializes in converting various types of video files to iPhone-compatible devices in just seconds. Batch-convert video files to various output formats Video and audio files can be added only by using the file browser since the 'drag and drop' feature is not available in this version. Even though this application is fast to process multiple files at once, you may have to wait a couple of minutes if you want to convert a large number of video files. Among the commonly used video formats such as AVI, MKV, MP3, MPEG, FLAC, MOV, OGG or MP4, iPhone Video Converter Factory Pro supports also less known formats like 3GP, DAT, DV, NSV, RM, RMVB and ASF. Plus, you can also convert audio files to popular iPhone formats. Change video and audio settings With the help of a user-friendly interface, you can easily trim and crop video files, merge them and apply a few effects, such as blur, sharpen, emboss, old film or mosaic. In addition to those effects, you can also adjust the brightness, contrast, saturation, noise and colors. Further editing functions allow you to change audio and video parameters concerning the resolution, encoder, aspect ratio, frame rate, bit rate, channels, volume and bit rate. Plus, you can save these settings as default or you can restore them to their initial values. Preview output videos and capture screenshots Before converting your video clips or while you edit them, you can preview them and decide whether to proceed with the conversion or not. Also while you preview videos, you can take snapshots and save them for a later use.
